

Face and Eye Detection Report

Generated on: April 27, 2025 - 14:55:02

Detection Success Rates

The graph below shows the detection success rates as more images are processed. The perfect 100% detection rate demonstrates the reliability of our face and eye detection algorithms across all subjects.

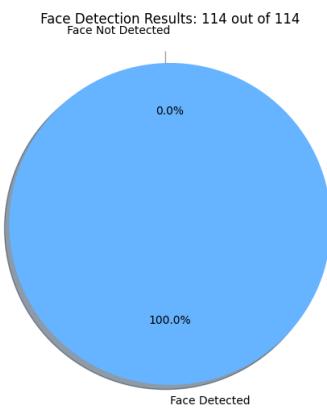

Detection Summary:

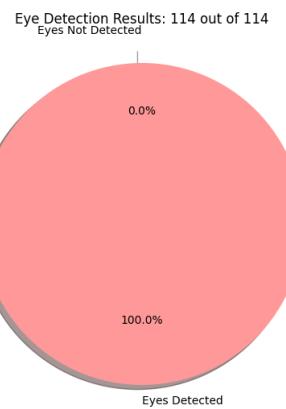

- Face Detection: 114 out of 114 (100.0%)
- Eye Detection: 114 out of 114 (100.0%)
- Full Success Rate: 114 out of 114 (100.0%)

Face and Eye Detection Statistics

Face Detection

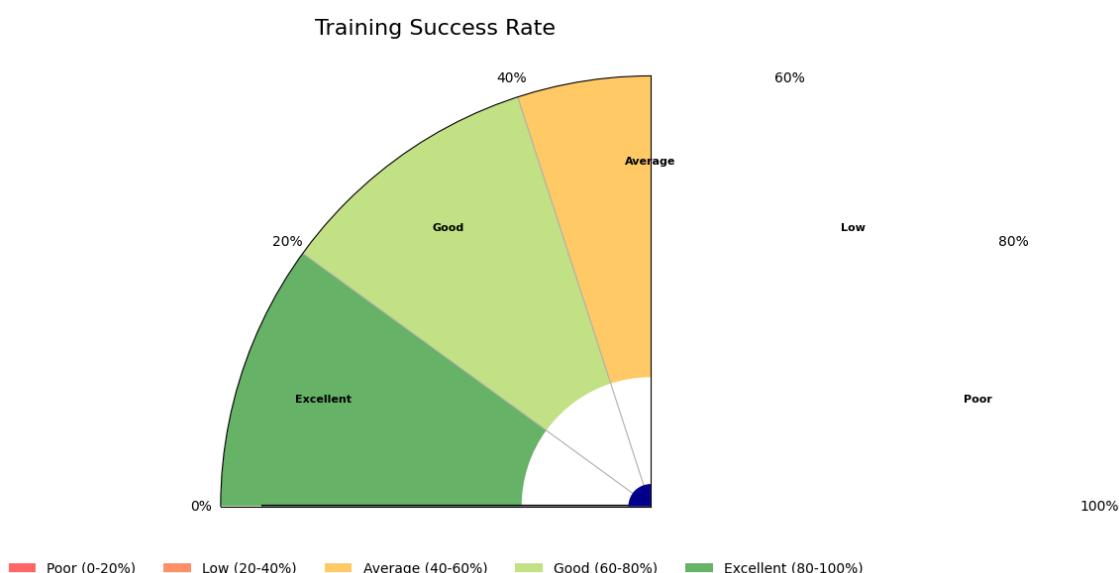

Eye Detection

Overall Detection Success Rate

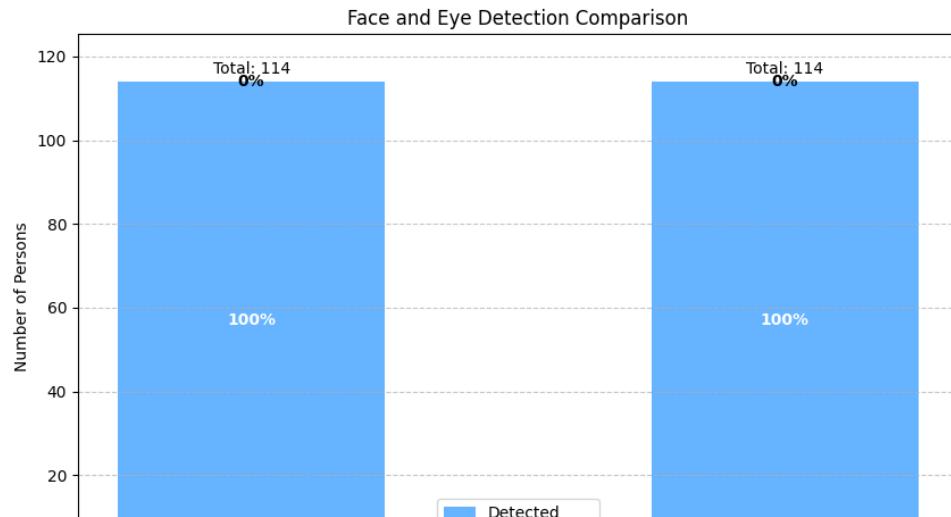

The gauge below represents the overall success rate of the face and eye detection system, combining both metrics into a single performance indicator.

Detection Methods Analysis

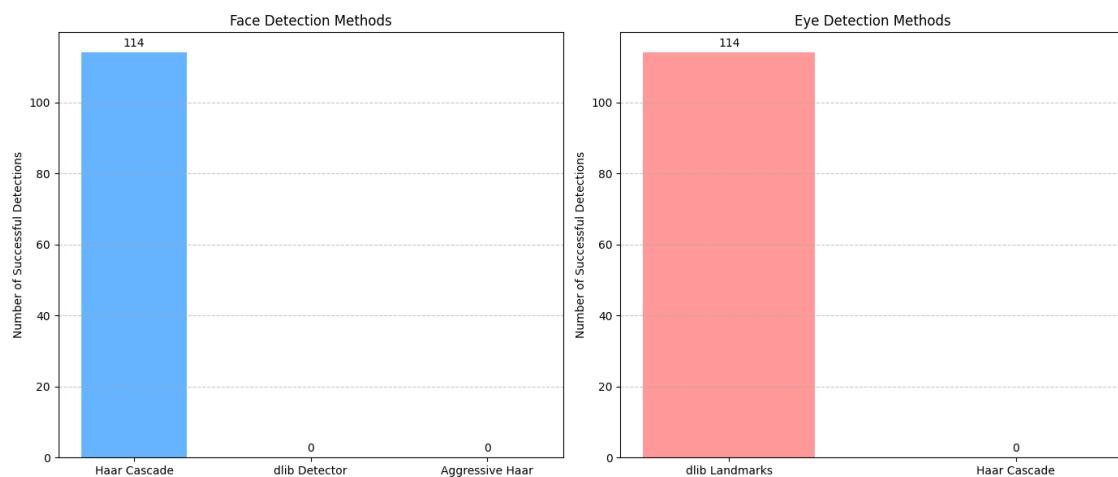

Face and Eye Detection Comparison

This chart compares the success rates of face and eye detection methods. The perfect 100% detection rates demonstrate the effectiveness of our multi-method approach.

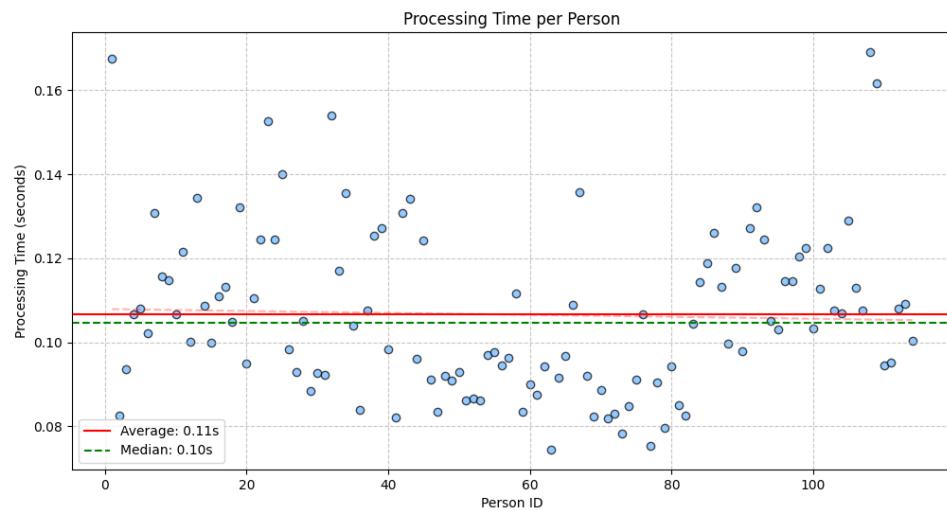

Detection Method Statistics

This section shows the contribution of each detection algorithm to the overall success. Multiple detection methods were employed to ensure maximum accuracy.

Performance Analysis

Processing Time Performance

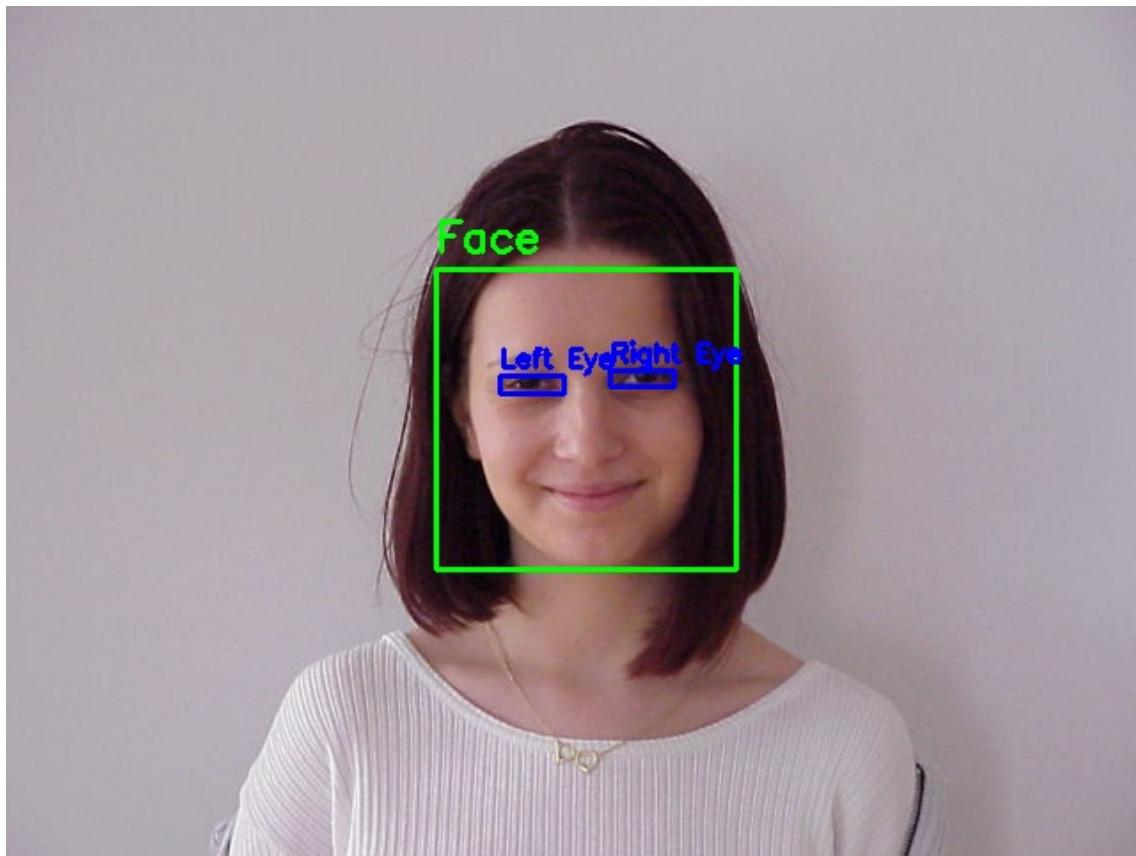

System Information

Property	Value
Operating System	Linux-6.11.0-24-generic-x86_64-with-glibc2.39
Python Version	3.12.3
OpenCV Version	4.11.0
dlib Available	Yes
